REMARKS

The figures of births and deaths shown in this statement for week ending the 18th August, 1956, relate to 221 towns with an estimated population of 30,362 thousands. The total number of towns is 318 and their population is 41,584 thousands. Thus 69% of the total number of towns representing 73% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 16,918 and 6,961 representing birth and death rates of 29.0 and 11.9 per thousand of population respectively.

(a) States (Part A and C):—The data here relate to 188 towns with an estimated population of 25,358 thousands. Information about West Bengal could not be included. The total number of towns is 253 and their population is 33,500 thousands. Thus 74% of the total number of towns representing 76% of the total population is covered. The number of births and

deaths recorded in these towns were 14,993 and 6,130 representing birth rates and death rates of 30.7 and 12.6 per thousand of population respectively. The table at the end gives the position by States. No town recorded a hi h death rate of 50 or over per thousand of population.

(b) States (Part B):—The data here relate to 33 towns with an estimated population of 5,004 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 51% of the total number of towns representing 62% of the total population is covered. The number of births and deaths recorded in these towns were 1,925 and 831 representing birth and death rates of 2000 and 806 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
